

Assignment Name: Chapter 9

Error Log Entry

What error message did you encounter (if any)?

I couldn't print the odd and even in different line and the ArrayList was keep getting errors.

What unexpected behavior did your program exhibit?

I added \n after 'print' but the line just starts in the same line.

What caused the issue? (e.g., syntax error, logic error, incorrect function usage, etc.)

Include a screenshot of specific lines of code.

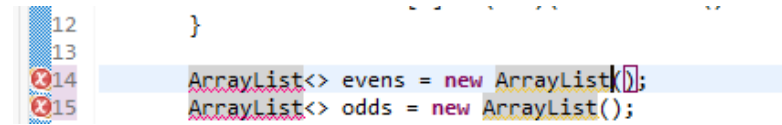

I added a blank line says that System.out.println(); to start a new line.

Provide the corrected code or solution using a screenshot.

```
for (int odd : odds) {
    System.out.print(odd + " ");
}

    System.out.println();

    System.out.println("EVEN: ");
for (int even : evens) {
    System.out.print(even + " ");
}
}
```

```
12 }
13
14 ArrayList<> evens = new ArrayList();
15 ArrayList<> odds = new ArrayList();
```
